 - Office 365 Ecosystem: SharePoint, PowerApps, Power Automate/Desktop, PowerBI
 - Soft Skills: Critical Thinking, Problem Solving, Leadership, Teamwork, Time Management
 - Certifications: Microsoft 365 Copilot, Full Stack Web Development (Udemy), Angular & Node.js (Coursera), Docker & CI/CD (LinkedIn Learning), ASP.NET & C# (Microsoft Learn)
-

Professional Experience

Freelancer

Software Engineer *Freelance* – Semarang, Indonesia (Remote) November 2024 – Present

Responsibilities:

- Designed and developed software solutions for various industries, including Textile, FMCG, and manufacturing.
- Managed full-stack development projects using C#.NET, Angular, Node.js, and other technologies.
- Ensured robust database management with MSSQL, Oracle, MySQL, and NoSQL systems.
- Provided technical support and troubleshooting for complex software issues.
- Conducted code reviews and implemented best practices to maintain high-quality code standards.
- Collaborated with cross-functional teams to deliver scalable and efficient software solutions.
- Delivered high-quality software solutions that improved operational efficiency and business value.
- Successfully managed multiple projects simultaneously, meeting tight deadlines and client expectations.
- Developed and maintained software applications using a variety of programming languages and tools.
- Collaborated with clients to understand their requirements and deliver customized solutions.
- Implemented CI/CD pipelines to streamline development and deployment processes.
- Utilized cloud technologies to enhance application scalability and performance. Key Achievements:
- Successfully delivered multiple projects on time and within budget, exceeding client expectations.

- Improved application performance and reduced server resource consumption through effective use of Docker and other technologies.

IT Developer

PT Yihquan Footwear Indonesia – Batang, Indonesia

August 2024 – November 2024

Responsibilities:

- Designed and implemented a robust Golang-based backend and Vue.js frontend, achieving a 30% reduction in system response time.
- Integrated GitLab CI/CD pipelines, automating deployment and reducing errors by 25%.
- Utilized Docker to containerize applications, enhancing scalability and reducing server resource consumption.

Key Achievements:

- Delivered a fully functional web application 20% ahead of schedule, exceeding client expectations.
- Streamlined deployment processes, reducing project turnaround times significantly.

IT Developer

PT Kino Indonesia Tbk – Tangerang, Indonesia

February 2018 – June 2024

Responsibilities:

- Designed and deployed custom business applications using PowerApps, Power Automate, and SharePoint.
- Lead full-stack development with ASP.NET C#, PHP, AngularJS, and Node.js frameworks.
- Ensured seamless database operations with MSSQL, MySQL, Oracle, and NoSQL systems.
- Conducted operational checks, server load balancing, and system schedulers maintenance.
- Collaborated with vendors for system updates and development initiatives.
- Developed comprehensive reporting systems, enhancing decision-making processes.

Key Achievements:

- Optimized application performance, reducing load times by 40%.
- Successfully implemented paperless approval systems, saving \$50,000 annually in operational costs.

IT Analyst and Project Lead

PT Asia Pacific Fibers Tbk – Kendal, Indonesia

September 2012 – February 2018

Responsibilities:

- Analyzed and upgraded systems and databases, replacing obsolete technologies.
- Delivered actionable insights through regular reporting and data analysis.
- Managed end-user project requests, ensuring timely and effective solutions.

Key Achievements:

- Reduced data processing time by 35% through optimized system designs.
- Led successful migration of legacy systems to modern platforms, improving reliability and performance.
- Improvement all project with 80% optimized and effectively.

IT Developer

PT Nextmercury Indonesia – Bandung, Indonesia

February 2009 – November 2011

Responsibilities:

- Enhanced system integration and collaboration across organizations.
- Developed corporate websites and conducted system audits to ensure security and performance.

Key Achievements:

- Improved system security protocols, reducing vulnerabilities by 50%.
 - Delivered multiple high-quality websites ahead of deadlines, boosting client satisfaction.
-

Key Achievements

Individual Projects

1. Kino Approvals System

- Technologies: PowerApps, Power Automate, SharePoint
- Achievement: Accelerated approval processes and eliminated paper-based workflows.

2. 5R System

- Technologies: AngularJS, PHP, MSSQL
- Achievement: Simplified 5R system input, increasing user adoption and recognition.

3. RPA Cost Delivery Report

- Technologies: Power Automate Desktop
- Achievement: Automated SAP delivery cost monitoring, reducing manual efforts.

4. Distributor Email Notifications

- Technologies: PowerApps, Power Automate, SharePoint
- Achievement: Streamlined communication through automated email notifications for distributors.

Team Projects

1. E-Procurement System

- Technologies: Golang, Vue.js, MariaDB
- Achievement: Enabled seamless vendor bidding for goods and services.

2. Portal and User Management

- Technologies: ASP.NET MVC, MSSQL
- Achievement: Centralized user access with single sign-on for multiple applications.

3. Sport Center Registration

- Technologies: ASP.NET MVC, MSSQL
- Achievement: Simplified sport center bookings for employees.

Education

Universitas Stikubank – Semarang, Indonesia

Bachelor's Degree in Information Systems (GPA: 3.00/4.00)

Accreditation: "A" BAN-PT

Certifications

- Microsoft 365 Copilot Certification (JobStreet)
 - Certification Microsoft Word Skills for Jobs (JobStreet)
 - Certification Microsoft Excel Data Analisis (JobStreet)
 - Certification Modul Pembelajaran Bahasa Korea untuk Pekerja (JobStreet)
 - Certification Pelatihan Excel Admin (JobStreet)
 - Certification Persiapan Kerja (JobStreet)
 - Certification Pelatihan Kerja (JobStreet)
 - Certification Project Management (JobStreet)
 - Full Stack Web Development (Udemy)
 - Application Development with Angular and Node.js (Coursera)
 - Data Management with MSSQL and MongoDB (Pluralsight)
 - Docker and CI/CD Development (LinkedIn Learning)
 - ASP.NET and C# Programming (Microsoft Learn)
-

Professional Portfolio

By Company :

1. PT Nextmercury Indonesia

- Project: Open-ERP Reporting Extend (GA-Report, Finance-Report, Employee&Overtime-Report)
- Technologies: Delphi7, PHP, ASP, Firebird, IBExpert
- Description: Enhanced system integration and collaboration across organizations. Developed corporate websites and conducted system audits to ensure security and performance.
- Achievements: Improved system security protocols, reducing vulnerabilities by 50%. Delivered multiple high-quality websites ahead of deadlines, boosting client satisfaction.

2. PT Asia Pacific Fibers Tbk

- Project: CRM System, Key Perform Indicator Employee System, Material Management Reporting, Yarn Production Reporting, Yarn QC-Reporting, Yan Production Planning Report
- Technologies: VB6, ASP.Net C#/VB Framework, PHP, MSSQL, MySQL, Oracle.
- Description: Analyzed and upgraded systems and databases, replacing obsolete technologies.
- Achievements: Reduced data processing time by 35% through optimized system designs. Led successful migration of legacy systems to modern platforms, improving reliability and performance.

3. PT Kino Indonesia Tbk

- Project : Kino Approvals System, Kino E-IDEAS, E-Sport Center, Creative-Job Request System, E-Promotion Good system, Portal and User Management (SSO), Auto-Email NPWP Sales Distributor System, Auto-Email DNMTI Sales Distributor System, 5R System and Reporting, Mitra Business Entertainment System and etc.
- Technologies: PowerApps, Power Automate, Power BI, SharePoint, ASP.NET C# Framework MVC, PHP, AngularJS, Node.js, MSSQL, MySQL, PostgreSQL, Integration with BAPI-SAP B1/A1
- Description: Designed and deployed custom business applications using PowerApps, Power Automate, and SharePoint.
- Achievements: Optimized application performance, reducing load times by 40%. Successfully implemented paperless approval systems, saving IDR 150,000,000 annually in operational costs.

4. PT Yihquan Footwear Indonesia

- Project : Guest Book System, E-procurement system (Bidding Method)
- Technologies: Golang, Vue.js, GitLab CI/CD, Docker
- Description: Designed and implemented a robust Golang-based backend and Vue.js frontend.
- Achievements: Achieved a 30% reduction in system response time. Integrated GitLab CI/CD pipelines, automating deployment and reducing errors by 25%. Utilized Docker to containerize applications, enhancing scalability and reducing server resource consumption.

5. Freelancer Software Engineer

- Technologies: C#.NET and TSQL, Node.js and Nest.js, Type Script and Docker
 - Project: Youapp (horoscope) user profile management, Banking Payment System Focus on (Setor, Tarik, and Transfer)
 - Description: Developed and maintained software applications using a variety of programming languages and tools. Collaborated with clients to understand their requirements and deliver customized solutions.
 - Achievements: Successfully delivered multiple projects on time and within budget, exceeding client expectations. Improved application performance and reduced server resource consumption through effective use of Docker and other technologies.
-
